

Covid-19 Management System

Brief description of the project:

In this project we will like to build a web application that will help the frontliner in this pandemic to see the total visualisation of COVID-19.

We will use PHP and MySQL in this project. Doctors/nurses can enter the data of COVID-19 patients. The head of the hospital can see the overall situation of the hospital.

Project members and their tasks:

Name	ID	Responsibility
1.Mohd. Istiaq Hossain junaid	1821577642	Work as backend developer and will help in statistical things
2.Nusrat Zahan Pritha	1721252642	Work as frontend developer
3.Mainuzzaman Mahin	1812774042	Work as backend developer
4. Raihan Mahmud Tahir	1921855042	Developing the frontend of the project.
